## Review for new companies declaring their first product

The review includes both product-specific requirements and business-wide requirements in the form of routines and processes. Approval is subject to the condition that the product and company meet all applicable requirements. Our partner Trossa AB is responsible for the review process.

The review process is divided into two stages as below where stage two includes an on-site visit:

- Step 1: Follow-up of compliance for part 1 (Quality requirements) and part 2 (Environmental requirements)
- Step 2: Follow-up of compliance for Part 3 Responsible supply chains

The company is called to information meetings before each step with the aim of clarifying the review process and what documentation the company needs to submit, as well as giving the opportunity to ask questions.
