MÖBELFAKTA

THE ONLY SUSTAINABLE OPTION

Möbelfakta is a unique reference and labeling system for furniture and interior fittings, with demands on quality, environmental and social responsibility. Furniture that meets the requirements contribute to sustainable development and allows people to make a conscious choice.

Quality

The furniture complies with recognised European and international standards.

Social responsibility

All parties in the supply chain producing the piece of furniture and its components comply with the requirements according to UN Global Compact.

Environment

Tough environmental requirements are imposed on raw materials and on the finished furniture, which ensure minimal impact in both manufacturing and use.

SUSTAINABLE DEVELOPMENT WITH MÖBELFAKTA

Möbelfakta's requirements are based on recognised well-established criteria from standardisation, authorities and international organisations. Möbelfakta is unique when it comes to making demands because it includes environment, quality and social responsibility – thus ensuring real sustainable development.

QUALITY REQUIREMENTS

Möbelfakta's quality requirements are based on recognised European and international standards ensuring the durability, function and safety of furniture, as well as resistance to wear. The furniture has been tested at accredited test institutes.

and the environment. Requirements on the finished furniture include labeling and traceability, maintenance and product information, spare parts, recycling and packaging. The criteria from the National Agency for Public Procurement form the basis for Möbelfakta's environmental requirements.

on the UN Global Compact. The furniture manufacturer controls its own operations as well as mapping and carrying out risk analyses of its sub-contractors. This is to ensure that the social requirements are met where the furniture and its components are manufactured.

ENVIRONMENTAL REQUIREMENTS

Möbelfakta sets strict environmental requirements for components and finished products. Raw materials and components have to meet strict criteria on chemical content, emissions, sustainable forestry and minimal impact on both humans

SOCIAL RESPONSIBILITY REQUIREMENTS

By making demands for social responsibility, Möbelfakta contributes to improved working conditions and a development towards better living conditions where it is most needed. The social responsibility requirements are based

THIRD PARTY REVIEW

An external third party auditor handles and approves the declarations and conducts regular audits of the furniture companies. All declarations must be renewed every five years.

Erik Berglund, begins at Carl Malmstens Verkstadsskola in Linköping, and becomes a furniture designer with Professor Carl Malmsten.

1953

VDN-fakta is created for testing and quality labeling of furniture with Erik Berglund as secretary. VDN-fakta gains international attention.

Erik Berglund launches Möbelfakta as a replacement for VDN. The focus is on testing product quality and the creation of a declaration system for properties such as durability and material quality.

1997

The label is expanded with requirements for environmental product declaration and environmental policy.

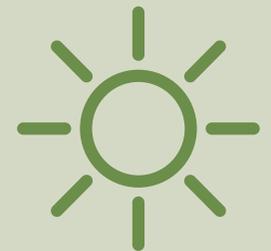

Launch of New Möbelfakta with social responsibility requirements according to UN Global Compact and comprehensive environmental requirements for production of components and finished furniture.

2030

Möbelfakta looks ahead towards the 17 Sustainable Development Goals of Agenda 2030

- Circular business models
- Renewable and recyclable raw materials
- Non-toxic products
- Social dumping must not be a competitive advantage

2045

By 2045, Sweden will have no net greenhouse gas emissions.

- 100% non-toxic products
- 100% circular, recyclable, separable products
- 100% renewable energy
